

## Teachers as Watershed Researchers Application

As a participant in this project, you will be part of a learning cohort that will examine research studies at 3 watershed field sites, over the course of three terms. You will be expected to participate in all three workshops as well as on-line discussion between workshops and the development of a field-based project in which to engage your students.

HJ Andrews Experimental Forest, August 13 & 14, 2009  
Newton Creek Wetlands and OSU, Sep. 28 & 29, 2009  
Oregon Hatchery Research Center, April 7 & 8, 2010

This opportunity is offered to 15 participants at no cost. For full consideration apply by June 15: after that date we will accept applications based on space available. Upon acceptance and prior to the first workshop you will be asked to complete a survey. If you choose to take the workshops for credit, you will be responsible for that cost.

### Teacher application & agreement

Name: \_\_\_\_\_

Address: \_\_\_\_\_

City: \_\_\_\_\_ State: OR Zip: \_\_\_\_\_

Day phone: \_\_\_\_\_ Eve Phone: \_\_\_\_\_

Email: \_\_\_\_\_

I have read the Secondary Teachers as Watershed Researchers project description and understand that participation is expected in all elements of the workshop. I am available for all of the workshop dates.

\_\_\_\_\_  
Teacher signature

Please attach a brief essay of how you hope the workshops will enhance your current teaching practice (no more than two paragraphs).

### *Principal Agreement*

The Oregon Natural Resources Education Program will provide this professional development opportunity at no cost to participating teachers. All material, lodging, food, and substitute reimbursement will be provided (does not include credit). While this is not a binding contract, we would like to know that you support the participation of the teacher applying for this program.

I support \_\_\_\_\_ participation in the above described professional development workshops and agree to release them.
