

Work study # ZZ0A5H9K0 / FERM Student Technician

Number of work study positions: up to 6 students

Workers will assist with taking basic forest tree seedling measurements in a lab setting. Other duties include seedling planting and tending, basic greenhouse cleaning, and some data entry using MS Excel.

Employees must be very reliable and responsible, with good attention to detail. Workers must communicate and work well with others as well as occasionally working independently under direction. Applicants should have experience in MS Excel. An understanding of basic tree biology is an asset. Forestry/ Natural Resources / Environmental studies / Biology students are preferred but not required.

Supervisor: Marilyn Cherry
