

JACKSON & PROCHNAU
INCORPORATED
CONSULTING FOREST ENGINEERS

PROFESSIONAL FORESTERS

CERTIFIED APPRAISERS

REGISTERED PROFESSIONAL ENGINEERS

Jackson & Prochnau Inc. is interested in hiring foresters for primarily timber cruising and inventory work. Two positions would be on a permanent basis and several temporary with an excellent chance for permanent employment for superior performers. Work would be on various projects in the Western U.S., primarily Western Oregon and Washington. Occasionally there are overseas projects.

There is substantial travel involved with some periods away from home of 5 to occasionally 10 days. Longer for overseas projects. Initially most of the work would be in the field. The base of operation would be either Albany, Oregon or the Olympia, Washington office.

At this time our primary need is for entry level foresters with some field cruising experience other than school based. Salary would range from \$2800 to \$3400 per month. We would consider fully experienced applicants capable of supervising inventory crews at a higher salary dependent on specific experience and ability. In this category experience should be primarily cruising/inventory. Our preference is for graduate foresters but applicants with one or two years college and substantial field inventory experience will be considered.

We also believe we will be interested in hiring June 2008 graduates. Again, field cruising experience is preferred.

All out of town living expenses will be paid by the company. A medical and dental plan is available for permanent employees.
