

Some very important information below about installing your ArcGIS software

Please also advise the students that as they register the software, **they should make sure to write out the full school name in the organization field rather than using any acronyms**, the word "Student", or the word "Self". When those words or initials are used, there is a delay in the registration time as it is required that ESRI manually review the registration rather than having the process be completed automatically.

Please advise each student to review the site listed below installing the software:

http://www.esri.com/industries/university/education/student_faqs.html
